   PDAs are no longer just cute little gizmos to keep track of appointments and to-do lists.
   As these small computers become more powerful with every generation, the possibly of
   their being really useful in a meaningful way is also increasing. The medical campus of
   Virginia Commonwealth University has had a keen interest in handheld technology for a
   number of years, and there have been numerous projects developed that involve PDAs.
   The number of commercial and shareware health related applications ...

   This paper discusses the introduction of a wireless network of personal digital assistants
   into a specialist unit of a hospital in Edinburgh. All of the technology has been used 'off-
   the-shelf' and 'out-of-the-box'. While we are able to report that the heterogeneous
   elements of this implementation have been integrated, work well together and that the
   users of the system are happy with it, the hospital context itself introduced a number of
   significant practical issues. ...
